CERTIFICATION OF MEMBERSHIP

To Whom it May Concern:

Dr. Paulo M. Raymundo is currently a Member in good standing of the American Geophysical Union (AGU). **Dr. Paulo M. Raymundo** joined AGU in 1986 and has a primary affiliation in our **Volcanology, Geochemistry, and Petrology** section.

AGU services its diverse membership through a broad range of publications, meetings, outreach, and other activities that support research in the Earth and space sciences. Many AGU members are involved in research of direct societal concern such as climate change, natural hazards, water supply and quality, and other environmental factors. AGU's membership includes many of the world's foremost geoscientists from industry, academia, and government.

For nearly a century, AGU has supplied an organizational framework within which geophysicists have created the programs and products needed to advance their science. From its beginnings as the representative of American geophysicists in the international scientific community, AGU has evolved beyond parochial boundaries of nation and discipline into an active community of over 60,000 scientists from 148 countries. AGU now stands as a leader in the increasingly interdisciplinary global endeavor that encompasses the geophysical sciences.

Mission:

The purpose of the American Geophysical Union is to promote discovery in Earth and space science for the benefit of humanity.

For additional information about AGU please contact me at 202-462-6900 or visit our website at www.agu.org.

Sincerely,

Antonio D. Covington
AGU Member Service Representative
